CAMPULSE GTC

ADVANTAGES

- Improved dust release
- 2 in 1 package saves space and money
- Optimal ability to handle daily fog and humidity
- Helicord design for efficient pulse cleaning
- HemiPleat ™technology- proven open pleat solution
- Non discharging F9
- andle daily fog

 Water resistant media

Application	For humid/dry heavy dust load areas. Our recommended choice for one-stage self cleaning air intake systems							
Frame	Galvanised steel;Stainless steel							
Gasket	Polyurethane, endless foamed;EPDM							
Media	Synthetic							
Separator	Hot-melt							
Sealant	Polyurethane							
Rec. final pressure drop	1000 Pa							
Max airflow	1,1 x nominal flow							
Max Temperature (°C)	70° C							
Relative Humidity max	100%							
Pleat	HemiPleat							
Comment	End caps: Available Galvanized steel (Standard), Powder coated, Stainless steel AISI304, Stainless steel AISI 31 Liners: External helical cords and internal screen, secure the filter element from movement without obstruction to the pulse Additional information: Available in Co/Cy, Tenkay, and in other dimensions on request.							

Our conical-cylindrical air inlet filters are available in vertical or horizontal designs, to best suit your system of choice. With our broad range of media, including EPA filters, we can offer an air inlet pulse filter for every environment and every gas turbine inlet. Camfil CamPulse with proven HemiPleatTM technology, combined with a synthetic media, delivers valuable benefits to gas turbine operation and maintenance.
